Master of Arts in Psychology

A two-year master's degree Programme in Psychology is aimed at imparting application aspects of psychological concepts across various aspects of work and life. Through this Programme students will develop an understanding of how psychological theories are applied to real-world situations. The course will focus on applying psychological concepts, theories, and processes to the fields of health, business, society, spirituality, and education. Techniques to evaluate contemporary local and global issues and topics using an applied psychological Perspective will be integrated into the teaching pedagogy. Further, the course will also focus on making the student more job-ready in various areas at the Individual, team and societal levels. Societal development will be one of the significant focus areas of this Programme which can be aligned easily with the mission and vision of Pandit Deendayal Energy University. MA in psychology will also facilitate the centers of excellence in specializations of psychology relating to specific sectors such as health, youth, disability and social justice, entrepreneurship and leadership, and developing standardized psychological assessment procedures. Teaching pedagogy for this course includes lectures, workshops, field projects, guest talks, field visits, internships and practical lab work. In the final year, Students are also required to submit two dissertations. Students' performance is evaluated through class assignments, mid-semester & end-semester exams, internships and dissertations are taken into account. This holistic approach to learning facilitates students in understanding the various theories and applying learned concepts in real-world situations.
